

Loveybums

Care Instructions

Fitted Diapers and Doublers: Wash on hot or warm with a mild detergent; tumble or line dry. Do not use bleach or fabric softener.

Organic diapers and doublers: Please wash before first use to remove natural oils and increase absorbency. Wash on hot or warm with a mild detergent; tumble or line dry. No bleach or fabric softener.

PUL Covers: Wash on hot before first use; wash on warm or cool thereafter and tumble dry low or line dry. No bleach or fabric softener.

Fleece Covers: Wash warm or cool, tumble dry low or line dry. No bleach or fabric softener.

Wool Covers: Handwash in cool water with a mild detergent or wool wash; hang dry. When your cover begins to lose some of its water resistance, you will need to re-lanolinize it. You can do this by dissolving a small (pea-sized) amount of pure lanolin (such as [Lansinoh cream](#)) in tepid water and soaking your cover for about 15 minutes. Adding a drop of baby shampoo to the water may also help to dissolve the lanolin. After soaking, wrap your cover in a towel to squeeze out excess water and hang dry.

Loveybums-in-Ones: Please wash the outer (cover) according to the directions for the particular type of cover (PUL, fleece, or wool-see above) and the snap-in diaper according to the directions for a fitted diaper.
